

Rainforest Deforestation and the Carbon and Water Cycles

Watch [this animation on YouTube](https://youtu.be/LBe4LTLOLvU) (<https://youtu.be/LBe4LTLOLvU>)

Suggested learning activities:

Data and GIS exercise for A Level students

Explore leaf area, evapotranspiration and temperature data using various statistical techniques to explore the relationship between deforestation and weather on [this resource on the RGS website](#).

Activity 1:

Ask students to write a voiceover for the film, demonstrating their understanding of the concepts involved.

Activity 2:

Complete this sentence based on the film:

When rainforests are deforested, places downwind are left with more/ less/ the same amount of rainfall and greater/ less/ the same amount of flood risk.

Activity 3:

Look at www.globalforestwatch.org/map and identify a Tropical region which has experienced deforestation in the last decade.

Look at earth.nullschool.net. What is the prevailing wind direction in that region?

Using www.google.com/maps, write a paragraph explaining how you think the water cycle has been affected by deforestation for a place downwind from the rainforest region you identified.

Activity 4:

Having watched the animation,

use <https://www.globalforestwatch.org/map>, <http://earth.nullschool.net> and <https://www.google.com/maps> to write a paragraph explaining how you think the water cycle has been affected by deforestation for a specific place downwind and/ or downriver from a rainforest region.

Activity 5:

Having watched the animation, read these articles from [Nature](#) and [NASA](#) (noting that this predates the Nature article), [NASA \(2019\)](#), [Geography Review](#) (p22 – 25) and [Carbon Brief](#). Summarise the impact of tropical deforestation on the carbon and water cycles.

More information about the [water cycle](#) and [climate change and the water cycle](#) and an excellent summary from [Cool Geography](#)

References

This news item from [NASA](#) relates to this animation, as does this [Nature Communication](#) from October 2020.
